

SMS Magic – Knowledge Base

 **Error** : “ Http failure response for https://app.sms-magic.com/api/v2/short_url/config: 400 OK”

Overview :

When a user tries to login into the sms magic portal , the portal throws an error with a pop-up saying “**Http failure response for https://app.sms-magic.com/api/v2/short_url/config: 400 OK**”.

Error Screenshot:

Resolution:

This is not exactly an error, it clearly says that the url shortening configuration has some defect. To avoid this error we should correctly configure it in both the ops portal (by telecom team) and also in the sms magic portal.

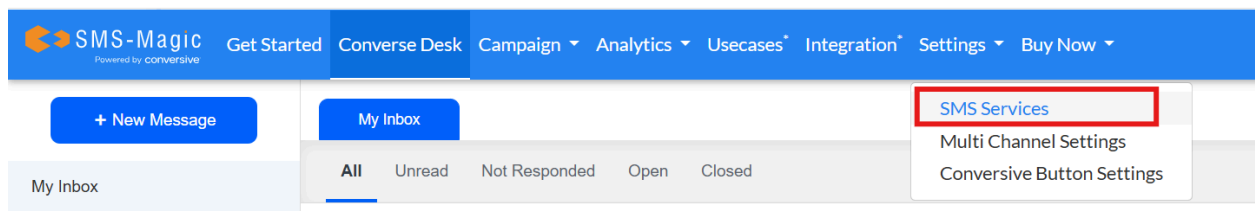

Steps To Resolve:

1.Login to sms magic portal

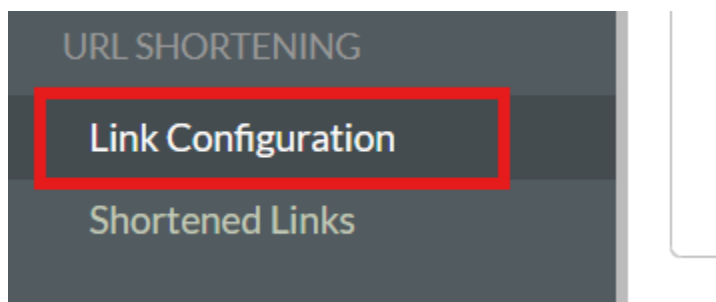

2.Click on settings from the ribbon

3.From dropdown select SMS Services

4.Scroll down to URL SHORTENING > Link Configuration

5.Select the domain , fill in the details and click save.
